

**Statement of the Ozone Transport Commission
With Regard To Advancement of Potential Regional Control Measures
for Emission Reduction from Appropriate Sources
and State Attainment Planning Purposes**

The Ozone Transport Commission hereby directs the staff of the OTC to work with State Air Directors to continue investigation and modeling work associated with all the potential regional control measures highlighted at this Fall meeting of November 2nd and 3rd, 2005, and to pay particular attention to those stationary, area and mobile source categories within the OTR expected to emit more than 10,000 tons per year in 2009 of NO_x, VOC or both, other appropriate sources suitable for seasonal control, and other cost-effective measures they may identify. The Air Directors are asked to provide all supporting information necessary so that the Commission may assess and decide on appropriate regional control measures to assist with attainment efforts at the February, 2006 Special Meeting of the Commission.

- Adopted by the Commission November 3, 2005
