Statement on Revised National Ambient Air Quality Standards for Ozone

District of Columbia

The Environmental Protection Agency (EPA) decision today to lower the National Ambient Air Quality Standard (NAAQS) for Ozone to 70 parts per billion begins a new round of Ozone planning for our members.

Maine

Maryland

The Ozone Transport Commission (OTC) was created by Congress under the Clean Air Act Amendments of 1990 to work with the EPA and coordinate ground-level ozone pollution control planning in the Northeast and Mid-Atlantic region of the United States.

Massachusetts

New Hampshire

Interstate transport of ozone air pollution continues to be a significant issue for OTC states in maintaining and meeting the 2008 ozone NAAQS, and will continue to be a significant issue meeting the revised standard. In addressing this significant issue, EPA must ensure that states are fully realizing their obligations under the good neighbor provision of the Clean Air Act.
